

Guardians of the Galaxy reviews-The most anticipated film of 2023

In December of 2022, the first official teaser was released, depicting the Guardians banding together for “one final time” to complete a dangerous task. The group’s mission to preserve the universe takes them throughout the galaxy. There they encounter anything from pebbles on a strange planet to a tentacled monster. Let me share some highlights of film in my Guardians of the Galaxy reviews.

Highly intense emotional scenes are expected

Gunn has been outspoken about Vol. 3 of Guardians of the Galaxy serving as the last excursion for the original cast. Because of this, the [film](#) will have at least one big fatality. In the same way as Avengers: Endgame was the swan song for the original Humankind’s Mightiest Heroes. This film is going to be the swan ballad for this particular squad inside the MCU. It seems to reason that, given this, the film will be rather moving.

The Guardians of the Galaxy have won over audiences for a decade despite the fact that they are not the MCU’s flagship superhero squad. They’ve been through a lot together and come out on top in terms of teamwork compared to the Avengers. It will be sad to see them go at the end of Guardians of the Galaxy Vol. 3.

Trailer is very promising

The first trailer for the MCU trilogy finale does an excellent job of setting the mood, with several sombre views of the intergalactic superhero squad singing along. The new [Guardians of the Galaxy reviews](#) expands on Gunn’s earlier teases about the film’s emotional plot. Now it seems to revolve mostly on Rocket Raccoon and the High Evolutionary. The new teaser suggests that the antagonist may have been responsible for his creation, leading the High Evolutionary to pursue him. Another suspense is that Bradley Cooper’s character Rocket’s backstory has been kept under wraps until now. New footage of Adam Warlock (Will Poulter) is another major addition to the new

Guardians of the Galaxy Vol. 3 teaser. Apart from a somewhat longer clip of his battle with Bautista's Drax, the new video doesn't add much to what we saw in the previous trailer. But it does give us better glimpses at the character's skills, such as his ability to fly and to use Quantum Magic to form dazzling energy constructions. Nevertheless, it is still uncertain whether Warlock and the High Evolutionary will work together to eliminate the Guardians or if they will pursue them individually.

Suspense has already been created

But, the teaser for doesn't provide any light on the topic of who among the team members would be sacrificed in the end. The new video provides many shots that imply Drax could be the one who will die. It is a claim confirmed by Bautista's declaration of finishing the role, despite the fact that most hypotheses have led to Rocket killing by the finale. Once the film opens in cinemas , we'll finally find out, until than good luck reading Guardians of the Galaxy reviews with your imaginations.
